How to Prepare Your Papers for the DPSWS

Joho Taro[1,†1,a]   Shori Hanako[2,b]   Gakkai Jiro[2]

Abstract: This document is a guide for preparing drafts and the camera-ready manuscripts using the LaTeX style file to be submitted to the DPS Workshop (DPSWS). Since this document itself is produced with the style files, it will help you to refer to its source file.

1. Paper Format for Submission

If you would like to submit a paper for the DPS Workshop (DPSWS) using LaTeX, you have to use the class file `dpsws.cls`. If you write your paper in Japanese, please indicate your paper format at the top of your tex source file as follows:

```
\documentclass[submit,techreq,noauthor]{dpsws}
```

If you write your paper in English, indicate your paper format as follows:

```
\documentclass[techreq,english]{dpsws}
```

The files for DPSWS, `dpsws.cls` and `dpsws.sty`, are created by deleting the header and footer from `ipsj.cls` and `ipsjtech.sty`, respectively. In case of a Japanese paper, we have also deleted the English title, authors, and abstract. For the detail of the paper format, please refer to the IPSJ journal style guide provided at the URL http://www.ipsj.or.jp/english/jip/submit/ronbun_e_prms.html [1].

Please do not ask IPSJ for the style files of DPSWS. DPSWS organizing committee also will not support preparation of your paper in principle. However, if you have any necessary questions on the paper style, please contact the organizing committee.

2. Troubleshooting about Character Code

The files for DPSWS are encoded in Shift JIS code for Windows users. If you use the files on other systems and meet an error due to the encoding, please convert them by an appropriate encoding format, for example, EUC and UTF-8.
